

THE UMMED INTERNATIONAL SCHOOL
ABU ROAD

TUIS/2021

Date: 19th June 21

Greetings from the TUIS family !

Dear Students,

The rapidly increasing significance of computational thinking and Artificial Intelligences, aggravated due to COVID – 19, adds an urgency to implementing a modern approach to our curricula. Keeping this in mind, The Ummid International School is tying up with top Indian company **White Hat Junior** to start a full- fledged year – long Coding Curriculum on their platform. The programme detail is as under:

Name of the programme:	Edge White Hat Junior
Eligibility: Classes	I to XII
Programme fee:	3600/- per year (after corporate discount)
Duration:	72 off line sessions during the academic year

The programme will start only after the school classes start off-line, trained teachers will train coding to the students. Kindly register yourself for online workshop & webinar for parent teacher engagement programme and clarity of the coding learning process before the programme starts offline. For any query or doubt you can call school office on the number **6376550554**.

Just as the digital revolution changed the world of information and knowledge, AI is changing the world of Intelligence, which is something that our students must surely learn to navigate. Students need to become active builders of CS solutions, understand what AI is, learn how to adapt to a constantly changing digital landscape, and build skills that machines cannot emulate.

The National Policy of Education 2021 also recommends all schools to incorporate education pertaining to Artificial Intelligence and Coding. Knowing this, we at The Ummid International School have made sure to re- imagine Computer Science at a different level and introduce Coding for our students from a very young age.

Thanks
